

# BESSEMETER PT-83

Precision you can  
**trust.**

Performance you can  
**count on.**

The Bessemeter PT-83 is a professional-grade pin wood moisture meter engineered to deliver fast and reliable readings.

- ✓ Instant, accurate readings from **6% to 25%** moisture content
- ✓ Ideal for thin stock and uneven wood surfaces
- ✓ Large digital LCD screen with convenient HOLD function
- ✓ Durable **5/16"** pins deliver reliable penetration and long-lasting performance
- ✓ Auto shut-off to preserve battery life

From the jobsite to the woodshop, you can **trust the PT-83** to deliver accurate results that safeguard your work and your reputation.

**The PT-83's short-pin design** is perfect for quick, non-intrusive readings in thin materials, irregular surfaces, or hard-to-reach spots. With a moisture range of **6% to 25%**, the **PT-83** helps you catch moisture issues before they turn into costly project failures.

With just **two buttons and a large, easy-to-read LCD screen**, you get precision without the complexity. The **HOLD function** lets you freeze readings on-screen, and the species selection lets you tailor readings to your wood type.

You can also maintain confidence in your readings with two Calibration Verification Reference options, sold separately.

## Looking to measure deeper into dense hardwoods or thicker lumber?

The **PT-83** is compatible with an optional slide hammer probe that gives you extra reach and control when you need it.
